

Fueling Location

Duke City Fueling is located with easy access from I-25 in Albuquerque, at the south west corner of Woodward Rd and Broadway.

Fueling Location
3203 Broadway SE • Albuquerque, NM 87102

Take Control

Successful Fleet Management

Successful fleet management involves more than keeping vehicles fueled and on the road. Monitoring fueling patterns and closely controlling when, where and how often vehicles fill up is part of the broader management game. Understanding a fleet's fueling activities sheds light on employee performance and anticipates vehicle maintenance. The successful fleet manager understands reviewing and applying performance data associated with their entire fleet can give them a competitive edge.

As part of the Commercial Fueling Network (CFN), Duke City Fueling is Albuquerque's one-stop partner for vehicle fueling and fleet management. Utilizing CFN's national processing network and connection to 3000 participating locations across the United States and Canada, Duke City Fueling provides fleet managers with the coordination, control and convenience they need to make cost effective decisions.

Simplified Fleet Management

Accelerated Fueling

Instantaneous Reporting

Centralized Tracking

DUKE CITY FUELING

Say hello to Duke City, your new fleet fueling partner.

Convenience

Drivers get in, get fueled, and get on their way

Easily accessible, our centralized location (see back leaf) features the simple amenities that make sure your drivers get in, get fueled, and get on there way.

State of the art fueling

4 high-speed diesel and 2 high-speed gasoline dispenser pump 25 to 36 gallons of fuel a minute. Security lights and cameras protect your people during off-hours while discouraging inappropriate and illegal activity.

Once a fueling session is complete, each fleet manager has immediate access to the transaction information- through either an emailed alert, or through the online administrative interface.

Every transaction at Duke City is recorded-so you can know exactly who is fueling.

High Speed pumps fill a 100 gallon tank in 4 minutes.

Reports on your fleet are available online anytime.

You control the hours your fleet can fuel.

Locally or on interstate, you can manage your fleet wherever they go.

One vehicle or a hundred, keep your fleet expertly managed.

Coordination

Reports to make fleet managers smile

Backed by the power of the CFN network, Duke City Fueling beams as the fleet manager's best friend. Especially when reporting and tracking are necessary for success.

Anytime access to your fleets records

Our online information portal enables each manager to know at any given time (in real-time) any activity related to each vehicle in their fleet. Tracking mileage and fueling amounts, planning for vehicle use and maintenance is simplified. And because this information is stored offsite, reporting on fleet activities is simple over a range of periods.

Local or interstate, track it all.

Whether your vehicles are used locally or rove over interstate routes, by filling them through CFN affiliates, you will be able to track all transactions through the CFN network. Giving you clear control over your costs and your vehicles. Centralized, accessible, and real-time data management makes DCF the sensible fleet fueling partner.

Control

Giving power and control to the Manager

Sporting an ideal location and a generous reporting network, Duke City Fueling is already an attractive managerial partner. But its real power lies in its ability to empower the manager.

A private network lets you control your fueling

Because our network is private and transactions are closely tied to each fleet, managers can simply and instantaneously minimize undesired activities. From applying time-of-day and day-of-week fueling restrictions to setting transaction and gallon limits, managers are capable of carefully enforcing fueling guidelines- with a minimum of interference or confrontation.

With immediate card lockouts, location permissions, the use of transaction alerts, and administrative access through the internet, the manager is never far from managing his fleet. Responsiveness, reliability, and regulation make DCF the fleet manager's empowering fleet management partner.
